ANALYTICS AND CRIME MAPPING

TOOLS FOR TACTICAL AND STRATEGIC DECISION MAKING

Real-time analytical reporting and mapping to support command staff in strategic planning

InfoShare® Analytics and Crime Mapping module provides real-time CompStat analysis and reporting, an Ad Hoc search engine, crime mapping, and analytical capabilities with graph generation. This module helps agencies systematically collect data, identify emerging trends, and use the power of advanced analytics to implement data-driven crime prevention strategies.

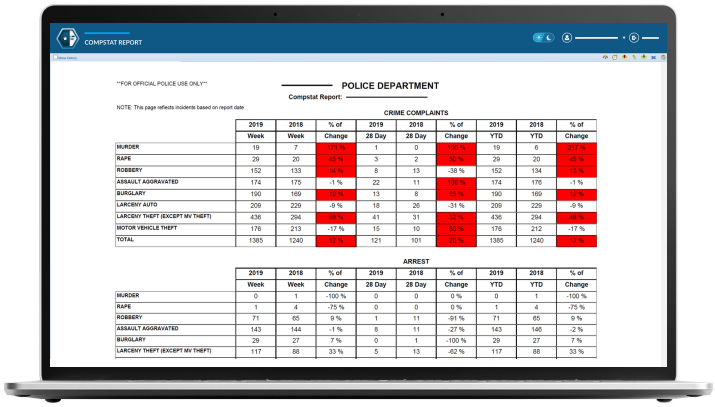

FEATURES

AUTO-GENERATED COMPSTAT REPORTING

Systematically collect and analyze crime data for data-driven policing. All Ad Hoc and CompStat reports can be generated for a specific time period, detailing exactly the number of crimes, quality of life offenses, accidents, and traffic citations in a jurisdiction.

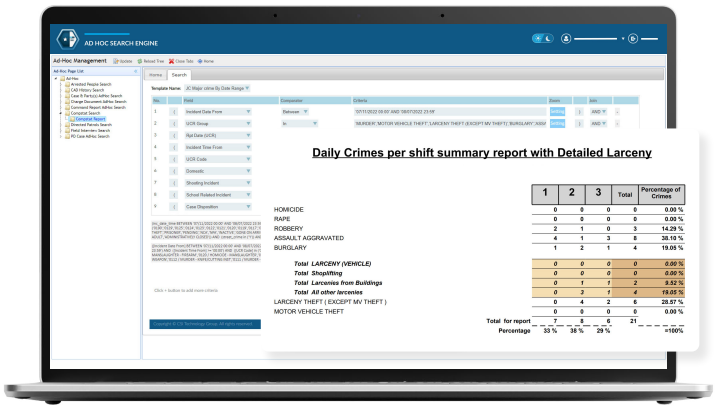

- Crime statistics comparison
- Percentage increase/decrease visualization
- Time period (hour, day, week, month, year)
- Arrests against Crimes comparison
- Reporting by agency, district, sector or post

EXCLUSIVE AD HOC SEARCH ENGINE

Deliver comprehensive statistics and analytical reports without having to run multiple queries in different databases. Simply enter the search criteria, and the relevant information can be parsed out into countless reports and formats with a click of a button.

- Reusable template generation
- Crime type search
- Arrested people search
- CAD history search
- Directed patrol search

NEXT-LEVEL CRIME MAPPING

Visualize criminal activity patterns, identify crime hot spots, and deploy proactive policing efforts. Drill down on individual incidents and easily access any linked reports. Configurable search features ensure users find the needed data as quickly as possible.

- Multidimensional incident analysis
- Hot spot and heat mapping
- Incident clustering
- Quality of life complaints
- Polygon map search

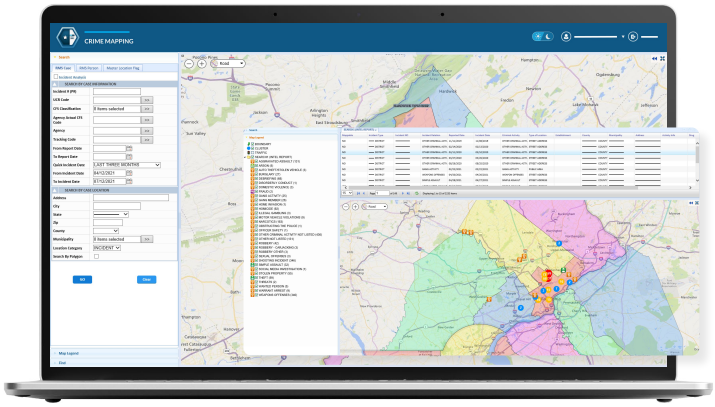

CHART AND GRAPH GENERATION

Generate a wide variety of charts and graphs to create a comprehensive picture of crime. Charts and graphs display complex data in a simple format, allowing agencies to visualize relationships, trends, and patterns of criminal activity and uncover investigative insights.

- CFS classification & crime type
- Timeline of crime data
- Time (day, day of week, month, year)
- Multi-tab display
