ANALYTICS

MEANINGFUL INSIGHT AND ACTIONABLE INTELLIGENCE

Visualize data to reveal relationships, trends, and patterns of criminal activity

Leverage advanced data collection and analytics to transform vast amounts of stored data into meaningful and insightful information, revealing crime trends and hidden patterns. Visualize data to draw connections to and between crimes, people, places, and vehicles. Analytics help agencies make better decisions, allocate resources more efficiently, and provide intelligence-led policing.

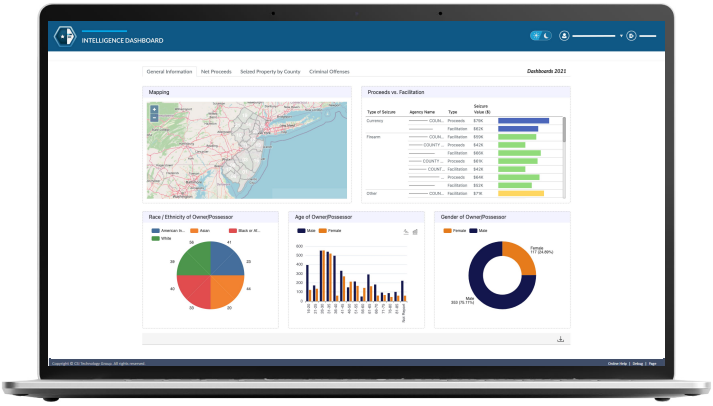

FEATURES

INTELLIGENCE DASHBOARD

Provide a visual snapshot of selected data including intelligence reports, analytics, and interactive graphs, configured to user preferences. Each segment can be expanded and explored in detail. Administratively, view which members are creating report and identify approved reports by week.

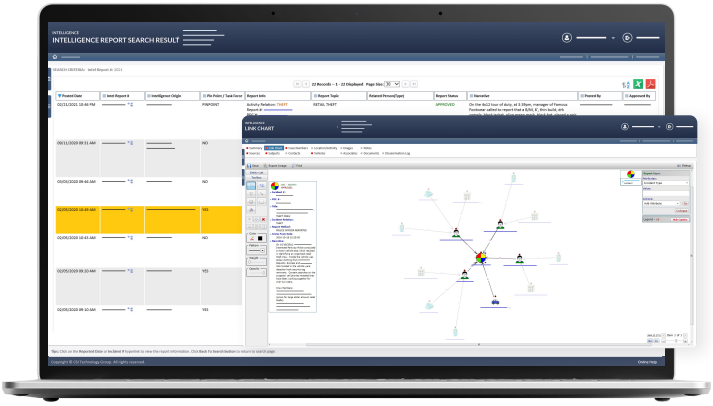

- Configurable display of reports and analytics
- Multiple datasets and graphs displayed in one window
- Interactive graph of new reports
- Expandable segments
- Multi-tab analytics data grouping

VISUAL LINKS

Create exportable visual link charts showing relationships between key objects. Simplify complexity, see context, and uncover hidden links or anomalies to provide insight for better decision-making.

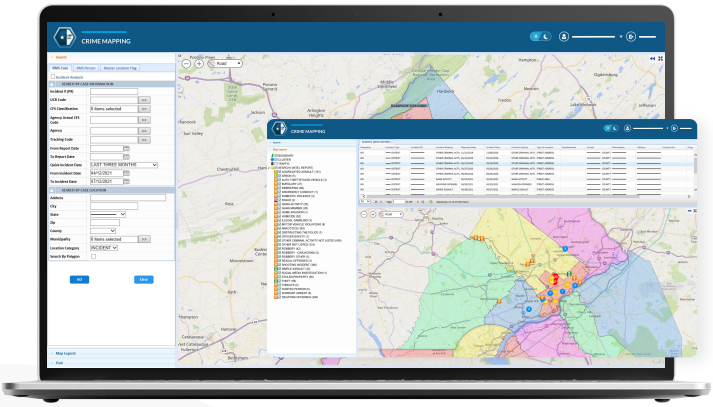

- People
- Locations
- Vehicles
- Phones
- Establishments
- Criminal Organizations

CRIME MAPPING

Visualize criminal activity patterns, identify crime hot spots, and deploy proactive policing efforts. Drill down on individual incidents and easily access any linked reports. Configurable search features ensure users find the needed data as quickly as possible.

- Multidimensional incident analysis
- Interactive crime mapping
- Hot spot and heat mapping
- Incident clustering
- Robust search configurations
- Polygon map search
