INTERVIEW RECORDING

INTEGRATED INTERVIEW ROOM A/V RECORDING SOFTWARE

Conduct remote interviews and store recordings directly in the case file

Equipped with comprehensive features for managing interview recordings, the application seamlessly integrates with InfoShare® so recordings are stored directly in the case file after the interview is completed. The Windows-based application launches right from the user's computer, requires no special housing/recording system, and is compatible with most HD cameras and high-quality synchronized audio. Live interviews can also be viewed from the web and from iOS-supported smartphones and tablets.

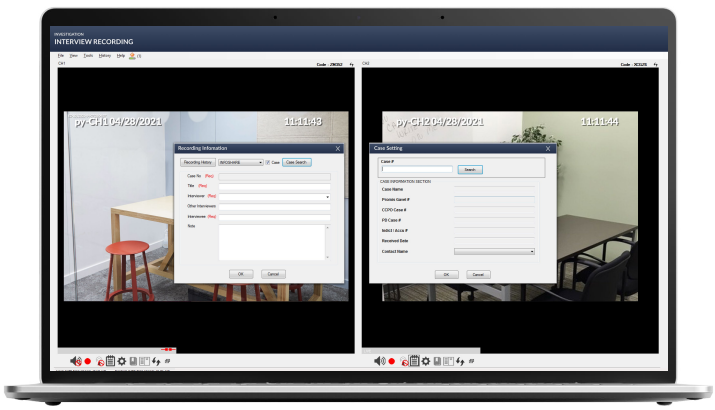

FEATURES

ONE SYSTEM RECORDING

Efficiently manage multiple interrogations and interview rooms from one recording station. The system accommodates up to four channels, allowing up to four video input devices from different locations.

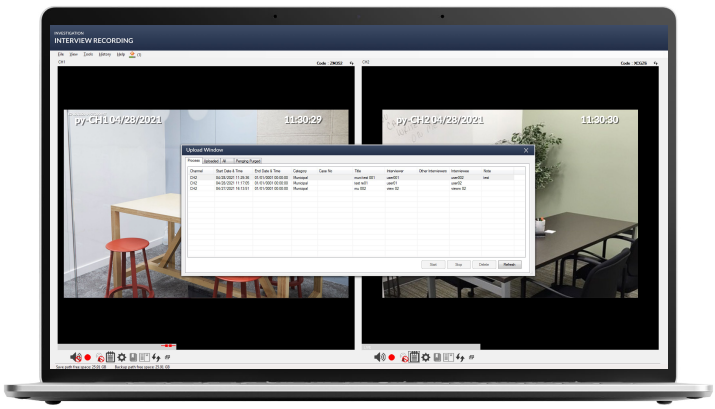

- Multi-room management on one station
- HD camera compatibility
- Audio and video synchronization
- Direct storage to case file

VIEWING/ RECORDING FEATURES

Users can quickly launch a recording session, manage the interview with recording features, review annotations, and control remote live broadcasting for authorized users (desktop, web, iOS-compatible devices).

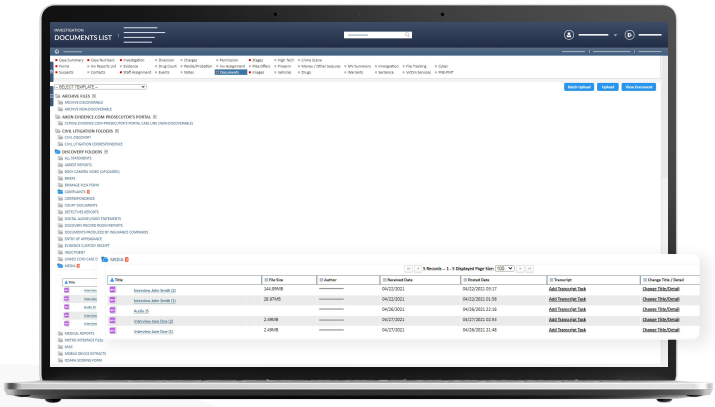

- Push button recording
- Bookmarks with annotations
- Visual sound bar indicator
- Mute/unmute speakers for attorney-client privilege
- Watermark with date, time, and case number

STORAGE/ PLAYBACK OF INTERVIEW

With CSI's patented InfoShare® Engine, all applications and modules benefit from seamless integration. Interview recordings are linked directly to an agency's case file or discovery package. They can also be burned to a disc or saved on the local system.

- Direct link to case file
- Burn to disc
- Intuitive search functions
- MP4 video and audio recording
- MP3 audio recording for transcription
