INVESTIGATION

MANAGE INVESTIGATIVE CASE DATA, DOCUMENTS, AND EVIDENCE

Complete case management system to support the investigation process

Manage investigations with an extensive range of information such as reports, evidence, contacts, assignments, arrests, warrants, and more. Document specialized investigation data including arson, burglary, death, narcotics, robbery, sexual assault, and vehicle crashes.

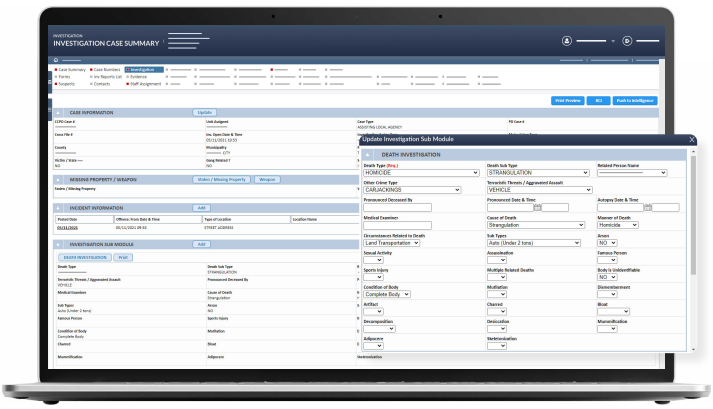

FEATURES

CASE INTAKE & DATA MANAGEMENT

Efficient case intake and organization of investigation information such as incident, location, investigation case type, suspect, police officer, organization, event, staff assignment, and disposition. Submodules contain crime-specific fields to assist investigative staff with special investigations.

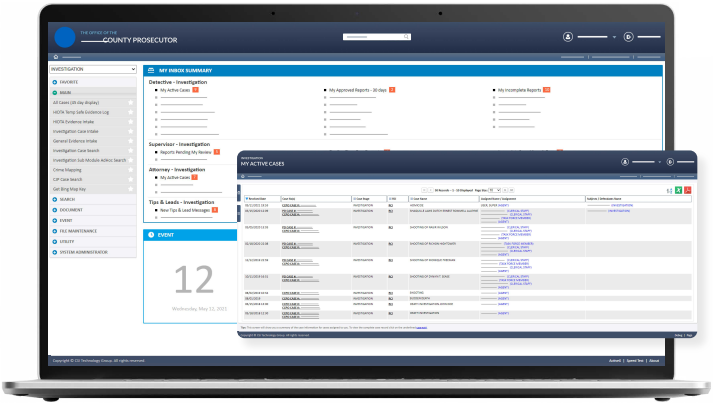

- Auto-search Master Index database
- Customized special investigation submodules
- Configurable support files and business rules
- Flexible region-, role-, or case-based permission settings
- Folder-based file management (discovery, LIMS, non-discovery, post-conviction)
- Evidence and case contact management

STREAMLINED WORKFLOW

A workflow-optimized user interface improves investigative staff productivity. Users can quickly locate caseload information, add case events, create reports, or view assignments and active cases from a single window.

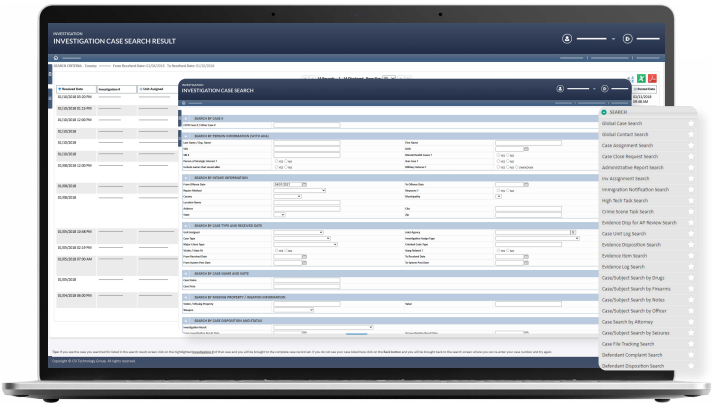

- User inbox assignment tracking
- Time management and scheduling calendar service
- Internal messaging system
- Multi-purpose investigation tab
- Template generation tool

EXTENSIVE SEARCH CAPABILITIES

Given the wealth of cases, documents, multimedia files, and reports, investigative staff need powerful search capabilities to quickly and easily find the necessary information.

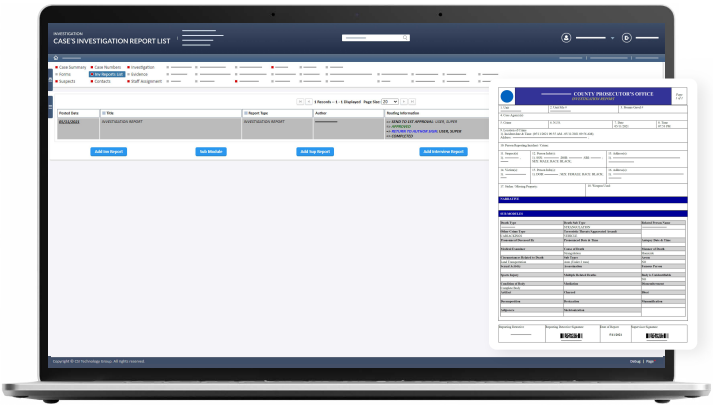

- Extensive global and local search options
- Permission- and security-based search restrictions
- Full-text search engine

INVESTIGATIVE REPORTING & APPROVAL

With CSI's patented intake form technology, users can create, customize, and re-use reports and send them to supervisors for approval. Robust permission settings ensure only authorized staff members can access and update a case.

- Prepopulated investigation, arrest, and supplemental reports
- Chief reports (unit monthly, time frame)
- Paperless reporting and approval with digital signature
- Patented intake form technology
- One-click subpoena/warrant generation

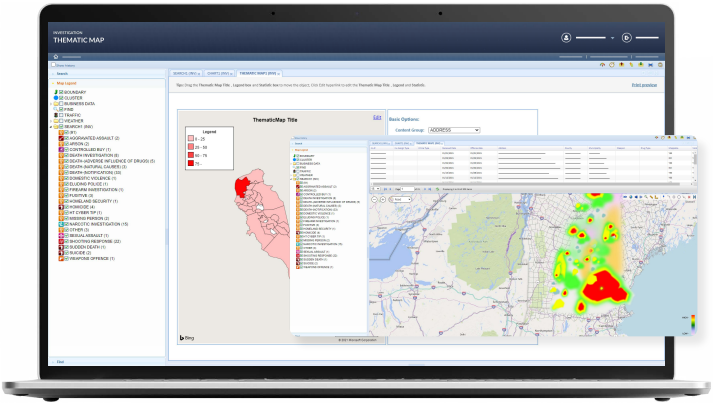

INVESTIGATIVE ANALYTICS TOOLS

Analytics tools leverage data for investigative insights, enabling users to run multidimensional crime analysis and advanced queries across disparate datasets. Users can visualize crime trends and the relationships between people, vehicles, organizations, and more.

- Crime mapping
- Link analysis
- Wildcard search
- Chart and Graph Generation

PREMIER SOFTWARE SOLUTIONS FOR EGOVERNMENT

CSI designs robust, fully integrated, and configurable software to revolutionize state, county, and local government operations.
