eDISCOVERY WITH PORTAL

EFFICIENT PREPARATION AND DELIVERY OF DISCOVERY FILES

Reduce time spent on discovery preparation by up to 75%

A modern, paperless approach to creating, viewing, organizing, and delivering discovery files. Documents and other multimedia files including transcripts, documents, photos, audio, video, and reports are organized in discovery packages in one central, secure repository. With the eDiscovery Portal, registered attorneys can easily request and receive discovery packages.

PDF CONVERSION

Convert all discoverable documents that are scanned, uploaded, or generated in the system into a PDF file to ensure the document(s) integrity.

DISCOVERY PACKAGES

Organize documents and other multimedia files into discovery packages quickly and easily, saving valuable time and money.

REDACTION & BATES NUMBERING

Protect privileged information with redaction and add bates numbers for easy identification and retrieval. Original documents can be viewed next to redacted copies.

MULTIMEDIA FILES & BILLING

Manage all discovery files, documents, images, and audio/video recordings together with billing in one central, secure location.

eDISCOVERY PORTAL

Request, receive, and deliver discovery packages to registered private attorneys, district attorneys, and public defenders via a secure portal.

VIDEO DISCOVERY

Handle massive video data with third-party cloud integration (Evidence.com, Wasabi). APIs enable user access to video footage without impacting existing bandwidth.
